

2026 CAD Contest Competition Host User Manual

Hardware and OS :

- **CPU** : Intel® Xeon® Gold 5320H (8 cores in each VM)
- **Memory** : 128GB
- **GPU** : No Discrete Graphics Processing Unit
- **Operating System** : RedHat 8

Software :

The table is the existing tool list and its script execution method. After execution, you can directly use the command of the tool to open the software.

Software : innovus INNOVUS_21.19.000 command : module load innovus; innovus -stylus
Software : conformal CONFRML_24.10.100 command : module load conformal ; lec
Software : design compiler 2025.06 command : module load dc ; dc_shell-t
Software : XCelium 24.09.006 command : module load xcelium ; ncverilog or xrun
Software : calibre aoj/2025.2_14.11 command : module load calibre ; calibre
Software : vcs 2025.06 command : module load vcs ; vcs
Software : Verdi 2025.06 command : module load verdi ; verdi or nWave
Software : library compiler 2024.09-sp2 command : module load lc ; lc_shell
Software : laker 2024.12 command : module load laker ; laker
Software : IC Compiler2 2024.09-sp2 command : module load icc2 ; icc2_shell
gcc and cmake version : libgcc-8.5.0-24.el8_10.x86_64 gcc-c++-8.5.0-24.el8_10.x86_64 gcc-gdb-plugin-8.5.0-24.el8_10.x86_64 gcc-8.5.0-24.el8_10.x86_64 gcc-plugin-annobin-8.5.0-24.el8_10.x86_64 libgcc-8.5.0-24.el8_10.i686

glibc 2.28

glibc-2.28-251.el8_10.14.i686

glibc-2.28-251.el8_10.14.x86_64

glibc-common-2.28-251.el8_10.14.x86_64

glibc-gconv-extra-2.28-251.el8_10.14.i686

glibc-langpack-en-2.28-251.el8_10.14.x86_64

glibc-devel-2.28-251.el8_10.14.i686

glibc-all-langpacks-2.28-251.el8_10.14.x86_64

glibc-headers-2.28-251.el8_10.14.i686

glibc-headers-2.28-251.el8_10.14.x86_64

glibc-gconv-extra-2.28-251.el8_10.14.x86_64

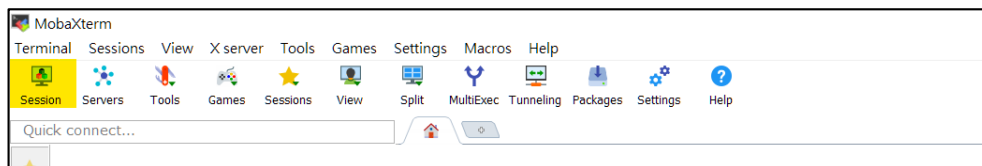

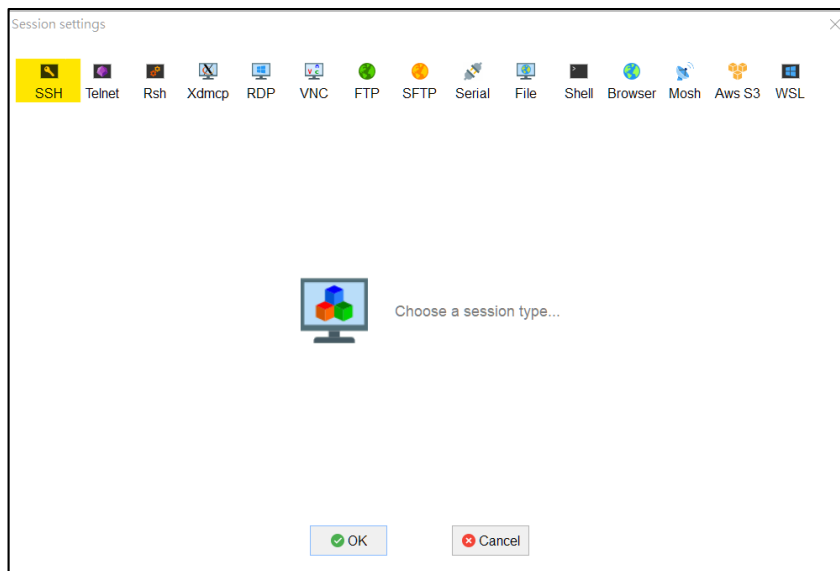

glibc-devel-2.28-251.el8_10.14.x86_64

Python

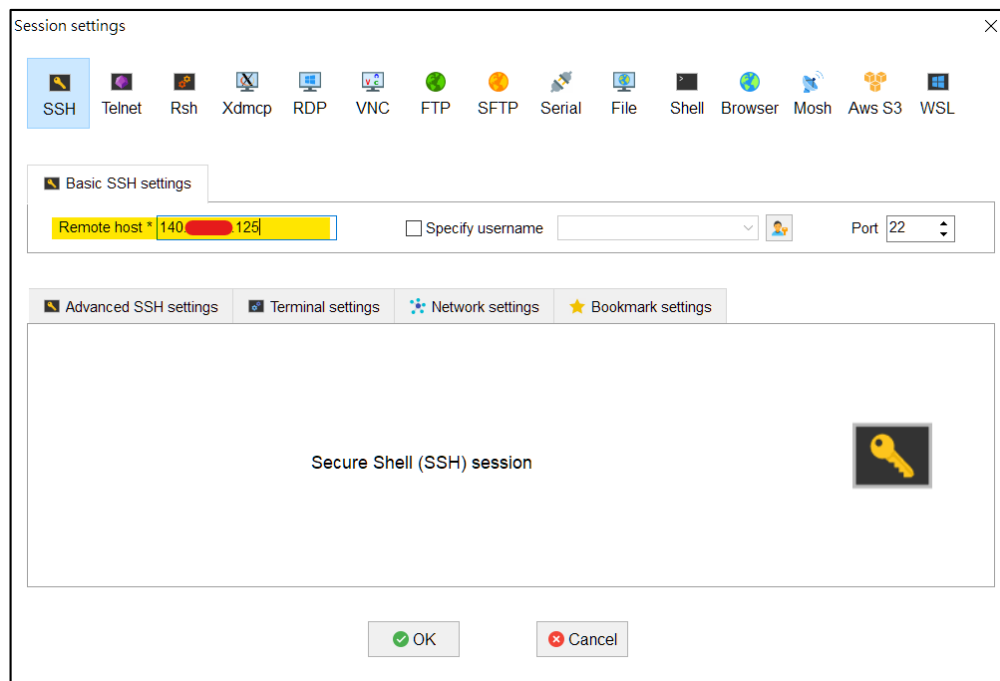

Python (2 & 3.6)

How to connect to the competition host :

This part outlines the method for connecting to the competition host via SSH. We will demonstrate how to establish this connection using MobaXterm. Additionally, other software capable of SSH connectivity can also be utilized for this purpose.

1. Open MobaXterm and click Session**2. Choose SSH**

3. Enter the competition VM IP

4. Enter your account and password to gain access and begin using the competition host
